

TELESCOPING BOTTLE JACKS

Capacity: 6-15 Ton

FEATURES

- Telescoping jacks offer all of the quality features and capabilities of the standard bottle jack line with a bonus. The super-long stroke of these jacks saves time and effort by eliminating the need to lift, crib, lift, etc. In most applications, the user can place the jack once and complete the lift.
- The A9015X offers very low clearance capability, making it the ideal choice for fork lift maintenance or machine lifting.
- The taller A9006X, A9011X and A9013X all feature a unique beveled base that allows the jack to "follow" the load laterally as it is raised, greatly reducing side-loading of the piston.

THESE JACKS OFFER GREATER EXTENDED LIFTING CAPABILITY.

SIDE WINDER JACKS

Mini Jacks

Capacity: 5-20 Ton

FEATURES

- Retracted height of just 63.5mm for the smallest jack and 130.2 mm for the 20 ton, allows you to slip this jack into the narrowest of crevices.
- Jacks operate either horizontally or vertically. Handles function in line with base for easier use in confined spaces.
- The perfect addition to any toolbox, this remarkable little jack has multiple uses that are limited only by your imagination. Use it as a jack or a spreader. Use it to turn your mechanical gear puller (puller capacity must match jack capacity) into a hydraulic puller. Use it vertically or horizontally in limited clearance.
